

Node.js & Express.js – 30 Days Industry-Level Roadmap

Phase 1: Node.js Fundamentals (Day 1–7)

- Day 1: Backend basics, Node.js intro, installation, first app
- Day 2: JavaScript essentials (functions, arrays, objects)
- Day 3: Async JS – callbacks, promises, async/await, event loop
- Day 4: Core modules – fs, path, os, http
- Day 5: npm, package.json, nodemon, dotenv
- Day 6: Modules – CommonJS vs ES Modules
- Day 7: Mini Project – File handling + HTTP server

Phase 2: Express.js Core (Day 8–15)

- Day 8: Express intro, server creation, basic routing
- Day 9: REST APIs, GET/POST/PUT/DELETE
- Day 10: Middleware – built-in & custom
- Day 11: Request handling – params, query, body
- Day 12: Error handling & status codes
- Day 13: MVC architecture & folder structure
- Day 14: Best practices & clean code
- Day 15: Project – CRUD REST API

Phase 3: Database Integration (Day 16–20)

- Day 16: MongoDB basics & Compass
- Day 17: Mongoose schemas, models & CRUD
- Day 18: Relationships, population, pagination
- Day 19: Validation & security basics
- Day 20: Project – User Management API

Phase 4: Auth & Security (Day 21–24)

- Day 21: Authentication vs Authorization, bcrypt
- Day 22: JWT – token creation & verification
- Day 23: Role-based access control
- Day 24: Security – Helmet, CORS, rate limiting

Phase 5: Advanced & Deployment (Day 25–30)

- Day 25: File upload (Multer) & email (Nodemailer)
- Day 26: Logging – Winston, Morgan
- Day 27: Performance – caching & compression
- Day 28: Testing – Jest & Supertest
- Day 29: Deployment – Render, Railway, AWS intro
- Day 30: Final Industry-Level Project
